Applications are invited for a full-time, non-tenure track position of Lecturer in Structural Engineering in the Department of Civil and Environmental Engineering at UNC Charlotte with primary responsibility for teaching undergraduate classes in the structures area, such as: statics, strength of materials, structural analysis, structural materials lab, structural design (structural steel, reinforced concrete, timber, and masonry), and mentoring structural engineering students in the senior capstone project. Candidates for the position must have a minimum of a M.S. in Civil Engineering and a P.E. license with at least 5 years of experience in structural engineering. Applicants must have a current authorization to work in the United States.

The ideal applicant will have significant professional, teaching, and/or laboratory experience, and a working knowledge of structural analysis/design software and relevant building codes. Review of applications will commence on or about February 15, 2014 and will continue until the position is filled.

As an EOE/AA employer and an ADVANCE Institution that strives to create an academic climate in which the dignity of all individuals is respected and maintained, the University of North Carolina at Charlotte encourages applications from all underrepresented groups. Finalist will be subject to a criminal background check. Applications must be made electronically to position #4624 at https://jobs.uncc.edu and must include a letter of interest, a detailed resume, and the names, addresses, email addresses, and telephone numbers of at least three professional references.
